Colour Temperature

Warm white 2000K - 3000K

Warmer white light is generally preferred for creating a more relaxed environment in living spaces, dining rooms, reception areas.

Cool white 4000K & Daylight 6500K

Cool white is a great choice for domestic areas where simulated natural light is preferred. Daylight is cooler still and, depending on your preference both are perfect for task areas, such as kitchens, bathrooms and utility rooms.

IP Rating (Ingress Protection)

Zone 1 - Above the bath or shower to a height of 2250mm. All lights fitted within this area must be a minimum of IP44 rated. Where a shower head is above the bath IP65 should be used. Lights must be protected by a 30mA RCD if supplied at mains voltage.

Zone 2 - 600mm outside of Zone 1 and a 600mm radius above washbasins. All fittings in this area should be a minimum of IP44, unless there is a danger of direct water jet spray in which case IP65 rating is required.

Outside Zones/Zone 3 - There are no special requirements in this zone in the UK. In Ireland Zone 3 requires IP rated products.
